Summary

Results-driven Frontend Engineer with **3+ years of experience** building scalable and high-performance web applications using **React.js, Next.js, TypeScript, Redux, and Material UI**. Skilled in **REST API integration, performance optimization, responsive UI development, and secure authentication**. Hands-on experience with **Node.js, MongoDB, Docker, AWS EC2, and CI/CD workflows**. Strong focus on clean code, reusable architecture, cross-browser compatibility, and delivering production-ready solutions in Agile environments.

Technical Skills

Frontend Technologies — React.js, Next.js, Redux Toolkit, Redux Saga, JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, Tailwind CSS, Material UI, Ant Design, Bootstrap, Electron.js

Backend & Database — Node.js, Express.js, MongoDB, PostgreSQL, RESTful APIs, JWT Authentication, RBAC

Cloud & DevOps — Docker, AWS EC2, Nginx, GitHub Actions, CI/CD, Render, Vercel

Build & Development Tools — Webpack, Babel, NPM, Yarn, Postman

Testing & Debugging — Jest, React Testing Library, Troubleshooting, Cross-Browser Compatibility

Version Control & Collaboration — Git, GitHub, Jira, Agile/Scrum

Core Engineering Skills — Performance Optimization, Code Splitting, Lazy Loading, Responsive Design, Accessibility (WCAG), Component Reusability, API Integration, UI/UX Optimization, Scalable Architecture

Experience

Techademy Learning Solutions Pvt. Ltd.,

01/2023 – Present | Pune, India

Software Engineer - Frontend

- Architected reusable UI components using **React.js** and **Material UI**, reducing frontend latency by **~20%** and improving platform efficiency.
- Integrated scalable **RESTful APIs**, enabling real-time data exchange and improving application responsiveness for thousands of users.
- Applied advanced React performance optimizations including **lazy loading, memoization, and code splitting**, achieving **~25% faster page load times**.
- Led Agile sprint planning and feature delivery for **8+ major releases**, consistently meeting project timelines and deployment goals.
- Debugged and resolved complex UI/UX issues, improving application stability and enhancing overall user experience.
- Collaborated cross-functionally with product, backend, and QA teams to streamline feature delivery and ensure smooth release cycles.

Key Projects at Techademy :

Make My Labs (MML)

- Cloud-native workspace management UI (React, Guacamole, AWS/Azure/GCP). Built live VM tracking, automated lab provisioning, integrated **Azure AD SSO** for enterprise clients.
- Designed and launched an automated **request management system**—streamlining lab provisioning workflows and increasing operational throughput.

- Strengthened platform security and accessibility by integrating **Azure AD SSO** and custom skip-login workflows, supporting enterprise-ready authentication and user onboarding.
- Developed a desktop agent using **Electron.js**, empowering users with interactive tutorials and stepwise guidance directly within virtual machines.
- Delivered advanced theme customization and VM screening features—enhancing usability, reliability, and client satisfaction.
- Reduced downtime through deep troubleshooting and optimization of authentication flows, improving system resilience.

Techademy Campus (B2A)

- Designed and implemented a secure, scalable **User Management UI** with integrated Role-Based Access Control (RBAC), enabling seamless onboarding and permission management for corporate clients.
- Created dynamic, role-specific dashboards featuring interactive analytics and graphical reporting—transforming data visualization and business decision-making.
- Enhanced codebase through component **reusability**, strategic **code splitting**, and rigorous cross-browser compatibility testing, driving performance and maintainability.
- Optimized dashboards for multi-device responsiveness, delivering smooth experiences on web and mobile platforms.
- Customized themes as per client requirements, ensuring consistent and user-friendly UI across diverse clients and user groups.

Project

AI Interview Simulator | Cloud-Deployed MERN Application [↗](#)

05/2026

GitHub: <https://github.com/kmanish9301/ai-interview-simulator> [↗](#)

Live Demo: <http://35.175.203.5> [↗](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Docker, AWS EC2, Nginx, GitHub Actions, Groq API, JWT

- Architected and deployed an **AI-powered MERN platform** for technical interview simulation with real-time evaluation and AI-driven feedback generation.
- Integrated **Groq Llama 3.1 API** to dynamically generate technical interview questions and automated answer analysis, reducing manual evaluation effort by **~80%**.
- Implemented secure JWT Authentication and protected routing mechanisms for secure session management and API access.
- Containerized frontend and backend applications using **Docker multi-stage builds** and deployed on **AWS EC2** with **Nginx reverse proxy** configuration for production-grade hosting.
- Engineered automated **CI/CD pipelines** using **GitHub Actions** and self-hosted EC2 runners, reducing deployment time by **~70%**.
- Optimized application performance using **lazy loading**, **code splitting**, and reusable component architecture, improving page load performance by **~30%**.

Certificates

- React.js Essential Training — LinkedIn Learning [↗](#)
- Node.js Essential Training — LinkedIn Learning [↗](#)
- Advanced Java Full Stack Development Certification [↗](#)

Education

Bachelor of Engineering in Electrical Electronics and Power Engineering, Priyadarshini College of Engineering | CGPA: 8.73/10

07/2018 – 07/2022 | Nagpur, India
